# CS EDM2000

## Windows native program

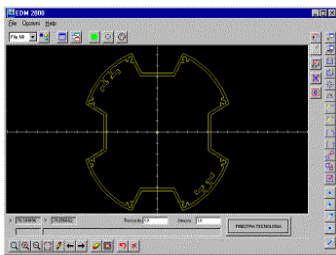

**CS EDM2000** is an easy-to use program oriented to serve wire EDM Machines on four axes.

**CS EDM2000** is **WINDOWS®** native and joins to the high performances the friendly use of Dialog Box and Icons.

The interpretation of more common CAD formats like MI, DXF, IGES 2D, IGES 3D enables the quick bridge from the mechanical drawing to the CNC File for machining.

The geometric window displays the loaded files and enables the commands to modify and optimize the drawing, the geometric window is also enabled to define independent geometry from the CAD :

## Geometric window - CAD file

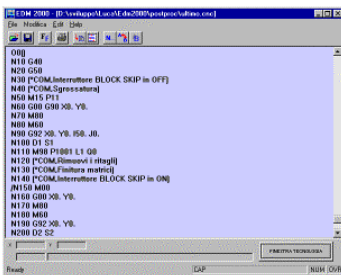

- ◇ POSITIONING OF THE ZERO WORKING (ALSO FOR A LOT OF PARTS SIMULTANEOUSLY LOADED).
- ◇ Clearing OF UNNECESSARY GEOMETRY AND MANAGEMENT OF THE ACTIVE COLOURS.
- ◇ REPETITIONS WITH POSITIONING AND ROTATION.
- ◇ INTRODUCTION OF NEW GEOMETRY (IE : **FILLETS** , **POINTS** , **SEGMENTS** , **ARCS** AND SO ON; DEFINITION OF NEW PROFILES NOT ACQUIRED FROM CAD).
- ◇ CORRECTION OF TANGENCY PROBLEMS USING THE COMMANDS TRIM, CUT, EXTEND.
- ◇ IMMEDIATE AUTOMATIC GENERATION OF CANONICS PROFILES (**SLOTS**, **POLYGONS**, AND SO ON).
- ◇ AUTOMATIC PROFILES IDENTIFICATION.
- ◇ AUTOMATIC POCKETING.
- ◇ PARAMETRIC INSERTION OF UNDERCUT IN THE SELECTED EDGES.
- ◇ AUTOMATIC GENERATION OF PROFILES FROM 3D SURFACES CUTTING  
**OPTION : IGES3D-CUT** enables the cut of 3D-surfaces, on parallel working planes directly from **IGES 3D** Files, to generate bidimensional profiles to obtain ROLLED SURFACES (3D SOLID) USING FOUR AXES.

## Technologic window

The technologic window displays the profiles to cut and enables the application of the technologic strategies, different for each profile, and the use of User-Defined strategies.

## Editor CNC Files window

- ◇ ALLOCATION AND QUICK CHECK OF THE TECHNOLOGICAL PARAMETERS, JUST INTRODUCED, SELECTING WITH THE MOUSE CURSOR THE INTERESTED PROFILE.  
CUTTING PARAMETERS FROM A WELL KNOWN DATA-BASE, CONNECTED WITH THE SELECTED CUTTING STRATEGY, QUALITY AND MATERIAL.
- ◇ CONNECTION OF TWO PROFILES (UPPER AND LOWER) TO GENERATE A ROLLED SURFACE (3D SOLID) USING FOUR AXES.
- ◇ DISPLAY OF 3D GENERATED SOLID.
- ◇ MANAGEMENT OF THE ADVANCED TAPERING. (ANGLE CHANGE ALONG THE CUTTING PATH).
- ◇ IMMEDIATE LISTING OF THE **CNC** FILE , CONNECTED WITH THE CURRENT MACHINING OPERATION, CAPABILITY TO MODIFY DIRECTLY EVERY LINE OF DATA.

## IGES3D-CUT

## Benefits :

- Simultaneous data INPUT and Check of DATA.
- Complete graphic representation of the job with drastic reduction of errors.
- Quick transition among the Geometry and Technology windows to editing : every modify acts immediately on the **CNC** File.
- Availability of a specially created Editor, on line, for a quick and safe setup of the **CNC** File.
- Graphic simulation of the **CNC** File.
- Availability of many and updated customized technological Data-Base.

Computer Aided Manufacturing Software

**CAM SOFT** puts at disposal of its Customers its solid experience in the solutions of problems in PCs connection, PC with machining tools connection, managing and multiple transmission of CNC Files to machining tools.

Since 1982 **CAM-SOFT** designs and realizes LAN Network and systems engineering, supplementing its products and services with **Hewlett-Packard™** hardware.

Windows® is a Microsoft registered trademark

## Our Company

CAM-SOFT has been working to realize technical informatic system since 1982, with the support of Hewlett-Packard hardware and software.

CAM-SOFT offers a solid experience in N.C. for the solution of hardware and software problems in the CAD/CAM area.

- ⇒ Organizational and technical advice
- ⇒ System supply
- ⇒ Customized software
- ⇒ Services

## Services

A comprehensive range of support services are available both for design (CAD) and manufacturing (CAM).

- ⇒ Technical advice
- ⇒ Customer training
- ⇒ Software update
- ⇒ On-site and phone support
- ⇒ Customized support
